

Installation of CyFinder App in Cytoscape

Prerequisite: Cytoscape is installed and running, and the .jar file for the CyFinder App is already downloaded to your local storage.

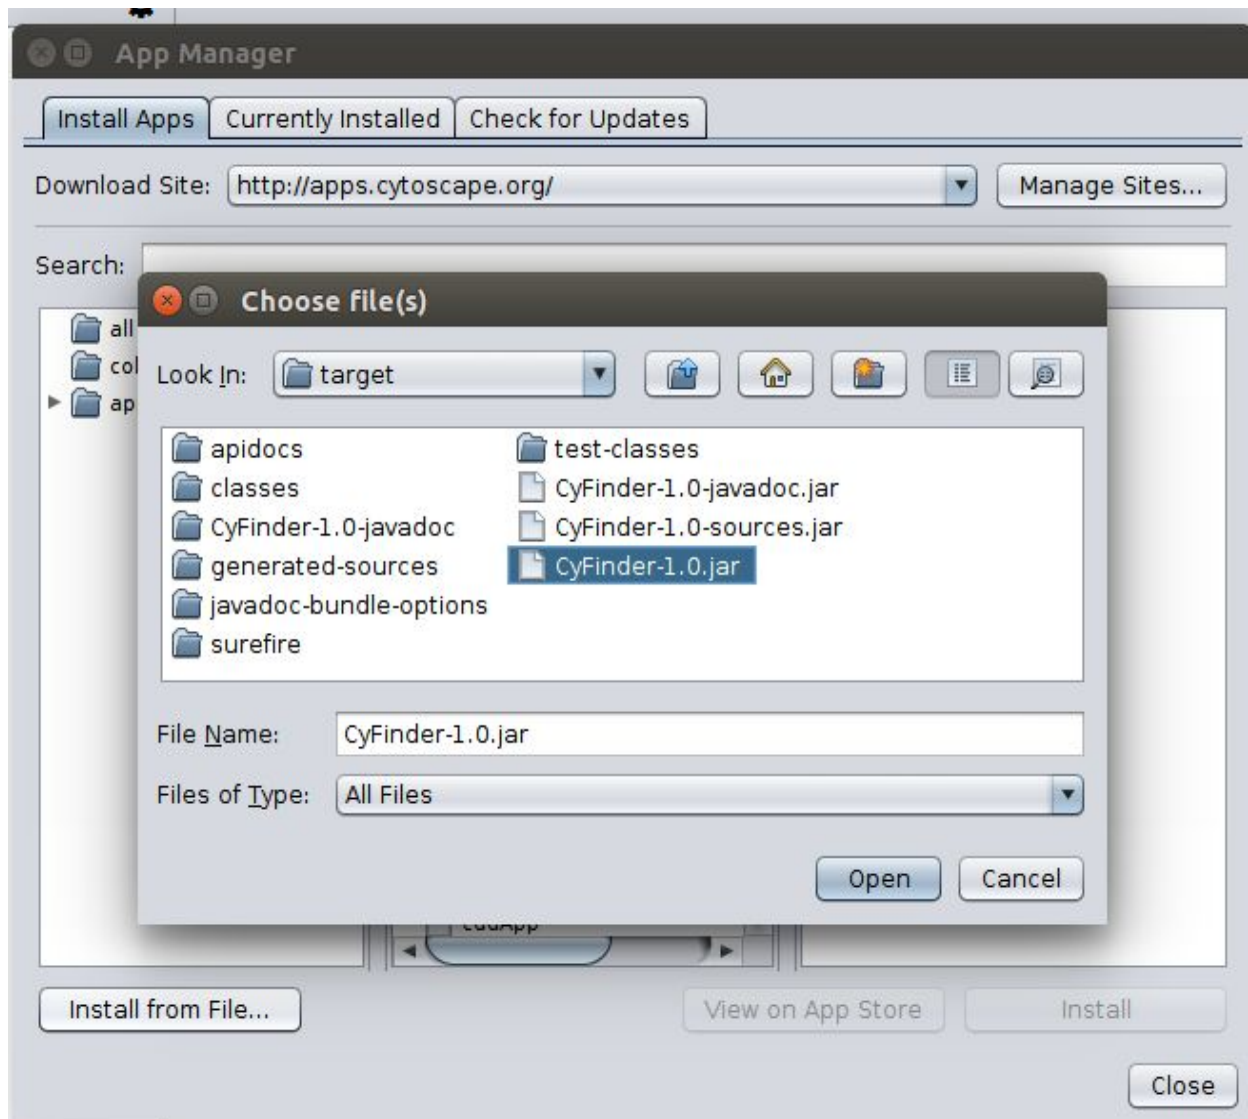

1. Select **App Manger** from **Apps** Menu in Cytoscape

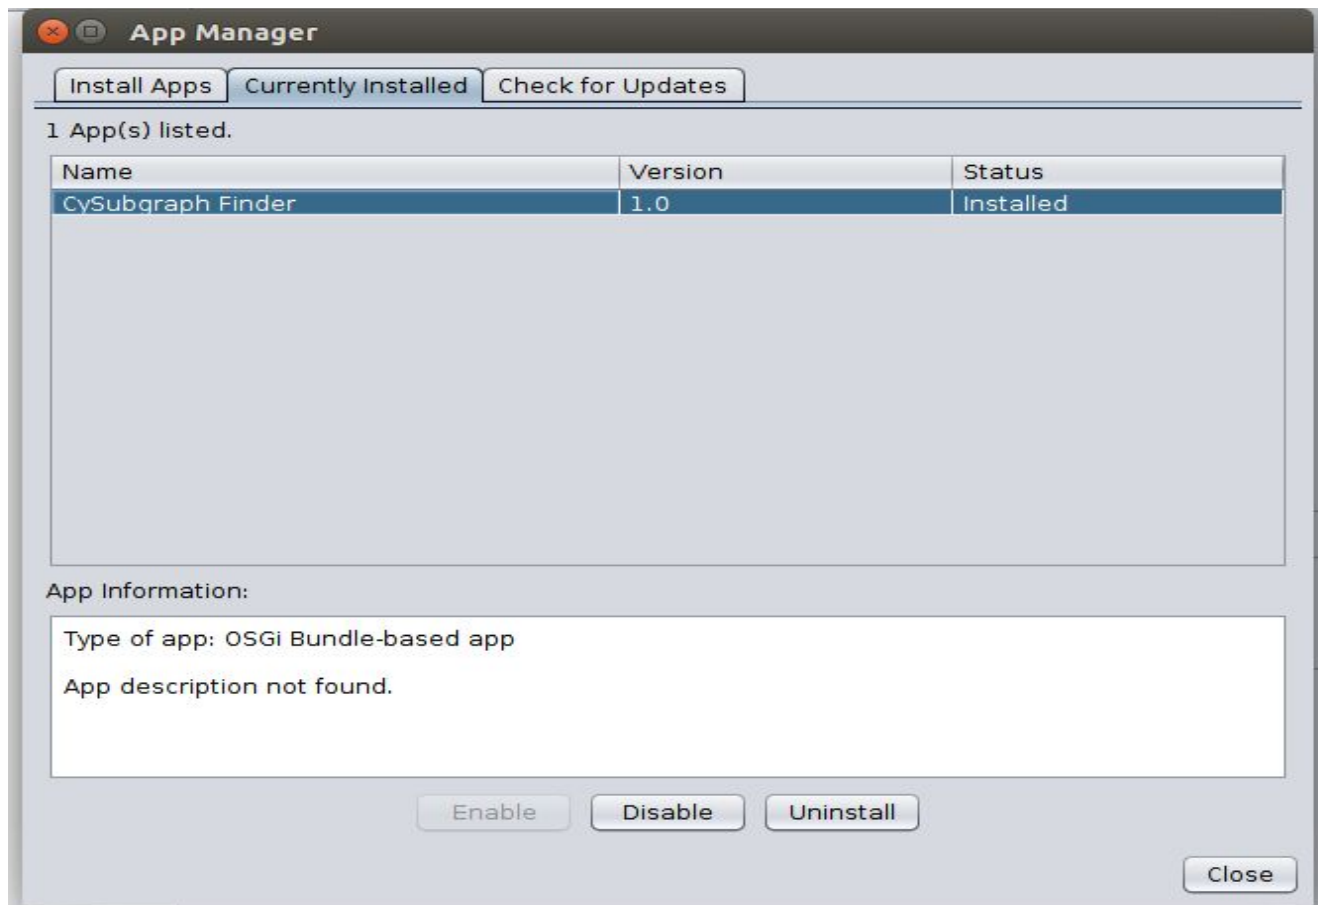

2. Click **Install from File**

3. Select the **CyFinder app jar file** from the storage location and click **open**

4. Go to **Currently Installed** tab in the **App Manager**, you should see CySubgraph Finder Installed as shown in the screenshot below.

5. Click **Close**.
